

Rete TanteTinte
TO PARENTS

On November 9th, has started the bonus for pc, tablet and internet.

The bonus for families will range from 200 euros up to 500 euros in the form of a discount and will take into account their income brackets and will also be used to buy PCs, tablets or internet connectivity at home for at least one year.

The requirements that families must meet in order to access the 500 euro PC and internet Bonus 2020:

ISEE under 20,000 euros for PC Bonus

ISEE under 50,000 euros for Internet Bonus

To take advantage of the bonus, applicants must have one of the following characteristics:

be without internet connection;

have a connection with a speed lower than 30 Mbit / s;

have a connection of at least 30 Mbit / s and be available to upgrade to a higher connectivity, up to 1 Gbps.

The 500 euro bonus is recognized for a period of at least one year, with which you can also have a computer or tablet at the same time as the activation of the contract.

The criterion, as always in these cases, will be exhausted: therefore the bonus is awarded to whoever asks for it first, through the operator.

To obtain the vouchers it will be necessary to contact the telecommunications operators (on any channel, online, shops ...), who have decided to join the initiative, the constantly updated list of which is available on the bandaultralarga.italia.it and www.infratelitalia.sites.it and activate an internet connectivity user.

The applicant must self-certify his ISEE and the fact that he does not already have an ultra broadband connection. The Government will carry out random checks.
